

A Few Days out from the arrival of 3I/Alex. I find it weird that the Gov can get Hi-Res Images of Pluto But not Hi-Res Images of objects arguably closer to Earth knowing we have some Satellites and probes out there in space.

I'm not going to Pretend I have any secret Information or any high level Insight - But something doesn't seem right in the grand scheme of things.

What if 3I/Alex is an alien probe or at worst an alien mother ship? What does humanity do? If I was an alien race that has perfected Interstellar space travel I would be smart enough to leave Earth alone!
